

Date: _____

Merck & Company
Kenneth C. Frazier, CEO
One Merck Drive
P. O. Box 100
Whitehouse Station, NJ 08889-0100

I, _____, have been informed about human fetal material taken from deliberately aborted children that is present in vaccinations that my child/children need and which are produced by your company. Specifically the vaccinations against Rubella and chickenpox.

Because of this I have elected to accept these immunizations under protest in order to protect my child/children's health.

I find it abhorrent and unconscionable that parents should be put in such a position to choose between the health of their child and their ethics, and I believe that as the manufacturer of these vaccines you have a social responsibility to either provide ethically acceptable alternatives that are not derived from aborted fetal tissue or stop producing immunizations in this manner altogether.

I demand that you begin to provide ethical vaccines against these diseases as soon as possible.

Sincerely,

Signature of parent/guardian
